

Amendment to Specification

I. *Please add the following between the invention title the first line of the specification.*

“CROSS REFERENCE

This application claims foreign priority under 35 USC §119(a)-(e), 172, or 365 to PCT Application No. PCT/KR2004/002607, filed on October 13, 2004, and KR 10-2003-0071175, filed on October 13, 2003, the entire contents of which are hereby incorporated by reference.”

II.. *Please replace Paragraph [0023] of the instant application publication with*

“[0023] There are same numbers of brackets corresponding to the teeth on the orthodontic wire W. And both ends of the orthodontic wire W are fixed using the anchor 9 driven at the field of the molars M, M', which makes the protruding front tooth F be corrected by means of the movement of it in the direction of the molars M, M'. At this drawing, the bracket B1, B2 or B3 [[B]] near the anchor 9 is fixed by a coil spring S instead of the orthodontic wire W. At that time, the anchor 9 for fixing the orthodontic wire W should be driven into a specific position, a point of some space between the roots of a pare of the molars M, M'. In order to do this, the anchors 9 are driven into using the apparatus for driving an anchor.”
